

ns3::DGRSinkHelper
::Install

ns3::DGRSinkHelper
::Install

ns3::DGRSinkHelper
::Install

ns3::DGRSinkHelper
::InstallPriv

```
graph LR; A[ns3::DGRSinkHelper::Install] --> D[ns3::DGRSinkHelper::InstallPriv]; B[ns3::DGRSinkHelper::Install] --> D; C[ns3::DGRSinkHelper::Install] --> D;
```

The diagram illustrates the relationship between public and private installation methods in the ns3::DGRSinkHelper class. Three separate boxes on the left, each containing the text 'ns3::DGRSinkHelper::Install', represent public methods. Three blue arrows originate from the right side of these boxes and point towards a single box on the right. This box, which has a gray background and contains the text 'ns3::DGRSinkHelper::InstallPriv', represents a private method. The arrows indicate that the three public 'Install' methods are implemented by delegating the call to the single private 'InstallPriv' method.
