

ns3::operator<<

ns3::operator==

ns3::Ipv4DGRRoutingTable
Entry::GetDestNetworkMask

```
graph LR; A[ns3::operator<<] --> C[ns3::Ipv4DGRRoutingTableEntry::GetDestNetworkMask]; B[ns3::operator==] --> C;
```

The diagram illustrates two operators, `ns3::operator<<` and `ns3::operator==`, both pointing via blue arrows to a single function: `ns3::Ipv4DGRRoutingTableEntry::GetDestNetworkMask`. The function name is displayed in a grey box, while the operators are in white boxes.
